

P2P Database Logical Data Model

File: wc636_P2P_data_model.mwb
Author: Walid Chatila
First Version Data: 2/6/15
Last Update Date: 2/10/15

Purpose:
The protein to phenotype database provides the user a further understanding of the relationships that proteins have to various diseases.
The protein information will be extrapolated from UniProt while the various disease information will be taken from Disease Ontology.
